

Designed Exclusively for Dodge Charger Police Vehicle

Trunk Storage Solution Option

- Provides optimal utilization of available space in vehicle's trunk.
- Efficient organization of trunk contents.
- Easier access to spare tire and other equipment mounted directly to the trays.
- Provides safe storage in the trunk and reduces the risk of damage due to loose projectiles during vehicle movement or accidents.
- Complete product description and how to order on reverse side.

DODGE POLICE OPTION

DODGE

DESIGNED EXCLUSIVELY FOR DODGE CHARGER POLICE VEHICLE TRUNK STORAGE SOLUTION consists of...

Trunk trays are constructed of a strong, lightweight aluminum alloy. They slide on heavy duty ball bearing slides, and latch securely in the closed position to allow full access to vehicle battery.

Both trays slide rearward, independently, for full utilization of the tray mounting surfaces. (*Lower Tray Measurements: 20 1/4" x 32 1/2"* *Upper Tray Measurements: 18 1/2" x 41 1/2"*)

Upper Tray: Upper Tray features a double layer bottom, (*1/2" gap*), so sheet metal screws can be used to mount equipment on the top tray without protruding through the bottom of the tray. This unique dual-bottom construction feature eliminates the risk of hazardous screw points being exposed, to avoid risk of human injury or damage to items stored on the bottom tray. Upper Tray can be used for mounting of electronic equipment, such as Strobe Power Supply, Power Distribution Boxes, Surveillance/Camera Equipment, Radio Equipment, Light Controllers, and Siren Amplifiers.

Lower Tray: Lower Tray provides easier access and safe mounting of the spare tire. Lower Tray comes with a spare tire tie down bolt and nut. Will accommodate either a full size or compact spare tire.

Includes Driver and Passenger side trunk storage boxes.

Both boxes are constructed of lightweight, strong aluminum alloy, with high-impact clear polycarbonate front panels.

Each box measures 18" long, 9" wide, and 7 1/4" deep.

Clear front panels allow for easy, convenient viewing of box contents.

Provides safety by preventing loose objects being thrown around in the trunk during vehicle movement.

Boxes are mounted securely to the floor of the trunk.

Boxes can be used to store items such as: Safety Flares, Safety Reflectors, Ammo Boxes, Small Fire Extinguishers, Jumper Cables, Flashlights, and tools.

These panels are located directly above the right and left side trunk storage boxes, on the inside of the trunk wall.

These panels function as guard panels to protect side trunk walls from damage potentially caused by shifting objects in the trunk.

Panels provide additional mounting surfaces for accessories and equipment.

Heavy duty rubber Tie Down Strap is permanently mounted under the trunk lid.

Tie-Down Strap enables easy tie down of the trunk when carrying large items such as bicycles and wheelchairs, etc.

The strap easily stores on the underside of the trunk lid when not in use. It is permanently attached so it won't get lost.

Trunk Storage Solution System is offered as follows:

1. Dual tray system only.
2. Saddle boxes (including accessory panels) only, set of two, right & left.
3. Complete **Trunk Storage Solution System** to include:
 - Dual trunk tray
 - Saddle boxes (including accessory panels), right and left
 - Y-Strap Tie Down
